

Essence of Living

**Orthopedic and practical sofa-bed**

Milano Bedding is introducing its chaise-longue, a J-shaped sofa-bed designed by Studio Project of Italy in clean, sophisticated lines. Its simple appearance is deceptive: it conceals surprises that are both esthetic and functional. With a light pull, it opens up into a spacious double bed with a visco-elastic orthopedic mattress and also conceals a storage compartment for books and magazines. One can also add a wooden tray with lighting. And the most important feature of all: when folded up into a sofa, there's no need to remove the bed linen and pillows.
